Environmental Impact Assessment - Test Report

1 Introduction

This synthetic report checks headings, lists and merged table cells. The predicted noise level is 55.5 dB(A) at receptor R-03.

1.1 Scope

- Air quality monitoring
- Noise and vibration
- Marine water quality

1. Baseline survey
2. Impact assessment
3. Mitigation

Bold text: **critical receptor** and *italic note*.

2 Results

Table 2-1 summarises the ambient air results.

Parameter	Location	Result (µg/m³)	Limit (µg/m³)
PM10	AQ-01	48.2	150
	AQ-02	61.7	150
NO2	AQ-01	21.4	200
	AQ-02	19.9	

Section A: General comments		
A.1	Clarify the fill source.	Open
A.2	Provide groundwater data, 12 samples.	Closed

3 Conclusions

All 4 monitored parameters complied with the limits. Total cost was 1,250.75 AED.
